LLM & AGENTS

LangChain LangGraph OpenAI API
Google ADK RAG / GraphRAG
MCP HuggingFace Qdrant
FAISS

MLOPS & INFRA

Docker Kubernetes MLflow
CI/CD FastAPI gRPC Databricks
Airflow Control-M

CLOUD & DATA

GCP Vertex AI AWS SageMaker
Azure ML PySpark SQL Pandas
Hadoop Power BI

DEV STACK

Python React Native Streamlit
n8n Git

LANGUAGES

English
C1 — IELTS Certificate
Spanish
Native
French
A2

EDUCATION

MSc Artificial Intelligence
AI & Knowledge Engineering
B.Sc. Systems Engineering
Universidad Tecnológica Nacional
Lic. en Psicología
U. de Mendoza — Gold Medal 2017

CERTIFICATIONS

- Microsoft Azure AI (AI-900)
- IELTS C1
- HuggingFace Agents Course
- Cognitive Neuroscience (Neuro-Transmitiendo)

PROFESSIONAL SUMMARY

AI Technical Lead & MLOps Engineer with 5+ years building production-grade LLM and agentic systems. Currently leading a multi-agent AI platform for telecom network diagnostics at Iatel, and co-founding Dualtherapist — a clinical AI platform approaching production with A2A multi-agent architecture, prosodic audio analysis, and real-time pipelines. Uniquely positioned at the intersection of Systems Engineering and Clinical Psychology. Proven track record at Fortune 500 environments (Accenture, BBVA/HP).

PROFESSIONAL EXPERIENCE

AI Technical Lead

Apr 2026 – Present

Iatel — Telecommunications / Enterprise AI

- Leading a 4-person team building a multi-agent AI system for automated root cause detection of network failures across major enterprise telecom infrastructures in Spain.
- Designing end-to-end cloud architecture integrating AI components, agent orchestration, and real-time data pipelines for complex network environments.
- Overseeing technical decisions, sprint planning, and delivery of a production-grade agentic platform combining LLM reasoning with structured network diagnostics.

Independent AI Consultant & Professor

2025 – Present

Northern International University / Self-employed

- Appointed professor at NIU delivering modules on AI-Assisted Psychometrics, Computational Psychopathology, and Conversational Therapeutic Systems.
- Built scalable RAG pipelines for health and education sectors integrating HuggingFace LLMs with Qdrant/ChromaDB vector stores for semantic retrieval.
- Mentored 20+ students through full NLP project lifecycle: LangChain architecture, FastAPI deployment, and production best practices.

AI Engineer

2024 – 2025

Accenture — Client: HP (Fortune 500)

- Designed and deployed RAG-based candidate evaluation systems using LLMs, significantly improving automation and assessment precision.
- Led MLOps strategy for HP supply chain predictive models: PySpark pipelines, Docker + Databricks CI/CD, and high-throughput data stream reliability.
- Optimized Kubernetes cluster resource allocation and autoscaling policies, reducing cloud infrastructure costs while maintaining model availability.

Lead Data Instructor & Technical Mentor

2023 – 2025

Henry Bootcamp

- Led 10+ cohorts as Technical Lead & Scrum Master through 45-day production-simulation sprints.
- Co-designed cloud-native architectures (Docker, FastAPI, MLflow) deployed by graduates to real production environments.

Big Data Engineer

2023 – 2024

Accenture — Client: BBVA (Banking)

- Orchestrated mission-critical ETL pipelines in a regulated banking environment using Hadoop, Spark on YARN, and GCP Dataproc.
- Implemented enterprise-grade Data Quality & Drift monitoring with Control-M for high-availability large-scale pipeline scheduling.

CLINICAL DOMAIN EXPERTISE

Licensed Psychologist with 5+ years clinical experience. Applies diagnostic precision to LLM evaluation (HITL), hallucination detection, and AI safety design for mental health and therapeutic AI systems.

RESEARCH BACKGROUND

APOLA

Structural Psychoanalysis — International Forums

Topology

Set Theory, Logic & Language formalization

KG Theory

Topological structures informing Knowledge Graph design

Speaker

Research papers at international conferences

DOMAIN FOCUS

Mental Health AI

Clinical NLP

AI Alignment

HITL Evaluation

Healthcare Tech

EdTech

FinTech

Supply Chain

LEADERSHIP & SOFT SKILLS

- Technical Lead & Scrum Master
- Cross-domain: Tech × Clinical thinking
- Fast learner — top academic track record
- Mentorship & knowledge transfer

Gold Medal

Best Graduate — 2017

Universidad de Mendoza

PREVIOUS EXPERIENCE

Junior Data Scientist

2021 – 2023

CEA Solidario (NGO)

- Built AI-driven behavioral analysis tools for autism assistance, integrating early ML models for pattern recognition and behavioral insights.

SELECTED PERSONAL PROJECTS

Dualtherapist — Clinical AI Platform (Co-founder & Tech Coordinator)

Multi-Agent A2A · MCP · Expo / Firebase · Firestore · GCP · Vertex AI

- Coordinating a 4-person team (frontend, backend, PM) building a clinical AI platform approaching production launch. Responsible for technical architecture and agent system design.
- Engineered a multi-agent system using A2A (Agent-to-Agent) protocols and MCP, performing complex temporal analysis and prosodic audio feature extraction from therapy sessions.
- Full-stack: Expo mobile app + Firebase/Firestore backend with real-time data pipelines and structured reasoning agents for automated clinical session evaluation.

Multi-Agent Knowledge Graph Builder

Google ADK 1.5 · LiteLLM · Neo4j · Python 3.11

- Orchestrated autonomous agents for automated entity extraction and Neo4j Knowledge Graph construction from unstructured data.
- Full pipeline from document ingestion to graph queries via Google ADK multi-agent orchestration and LiteLLM routing.

MetaAgent — Hybrid Memory AI System

LangChain · FAISS + Qdrant · OpenAI API · Docker

- Persistent AI assistant with hybrid vector memory (FAISS + Qdrant), human feedback scoring loops, and long-term context retention.
- Containerized with Docker; session persistence with automated memory consolidation and scalable deployment pipeline.

Production MLOps Pipeline — Sentiment Analysis

DistilBERT · FastAPI · MLflow · HuggingFace Spaces · CI/CD

- Deployed production DistilBERT model (80% accuracy) on HuggingFace Spaces with Gradio UI and automated CI/CD for model versioning.
- FastAPI inference endpoints, MLflow experiment tracking, batch processing, and comprehensive visualization dashboards.

CONTINUOUS PROFESSIONAL DEVELOPMENT

- AI Techniques: Prompt Engineering, Fine-tuning, RAG, Transfer Learning — HuggingFace Agents Course
- React Native (Expo), Advanced Backend Scalability, AWS Serverless Architecture (VPC, IaC)
- Specialization in Cognitive Neuroscience — Neuro-Transmitiendo (2024)
